Cloud Architect for NNIT Life Science Solutions

Apply Now

Company: NNIT

Location: Denmark

Category: other-general

Join us in the digital health revolution and tackle the biggest opportunities and challenges at the intersection of life sciences, information, and technology.

As a Cloud Architect, you will use your knowledge and experience to identify, understand and transform customer requirements into IT solutions characterized by NNIT's quality. This will often be as the Lead Architect for large and complex customer' projects where you fulfill the role of an Architect and trusted advisor. You will be responsible for turning vision into a value-adding business solution and making sure it is well adopted and praised by our customers.

You will be an important member of the team that consults on behalf of leading pharmaceutical, medical devices and biotechnology companies. Responsibilities will include preparing engagement estimates, leading workshops and technical tracks e.g. design and establishing the needed cloud infrastructure to support our services and solutions.

NNIT Life Science Solutions' customers are the biggest pharma companies, geographically spread across Europe and occasionally in the US.

Your responsibilities as a Cloud Architect

Act as the Lead End-to-End solution architect on highly complex IT projects and consultancy assignments with focus on the cloud layer.

Analyze, documents and clarify our customers' business objectives (functional and non-functional) in order to design viable technical IT solutions.

Create diagrams, domain models, and other types of software artifacts to decode particular problems and create solutions.

Ensure all required architectural decisions are made, documented and implemented in a timely manner.

Ensure all necessary industry documentation standards are followed.

Work closely with the customer, your colleagues in NNIT Life Science Solutions as well as internal stakeholders to ensure the quality of deliverables.

Be able to think end-to-end solution architecture applying all necessary solution components using a sound and methodical approach.

Actively participate in the overall NNIT architectural direction influencing projects assigned to you, including the identification of approaches, tools, and techniques to meet the given requirements.

You will be working in an environment that values development, provides challenging careers, and provides a wide range of benefits to support your daily life, so you can focus on delivering high-quality services and solutions towards our customers.

Your qualifications and experience

Min. 5 years of experience working as an Architect or in a similar role.

Solid hands-on experience with Microsoft Azure Cloud.

Microsoft Certified: Azure Solutions Architect Expert.

Experience with Infrastructure as Code (IaC) principles and tools (e.g. Terraform, ARM or others).

Ability to design and implement cloud infrastructure, platforms, and applications.

Excellent consulting mindset coupled with the ability to sell solutions by exercising your drive for results in front of customers.

Track record of success acting as a customer facing technical lead.

Already based in Europe within Poland, Czech Republic, Germany, UK or Denmark.

You might also have experience with:

Applying TOGAF or other architecture frameworks.

DevOps, Agile, Scrum, Github.

Veeva Vault SaaS or other relevant Life Sciences software.

Proficiency in scripting languages (e.g. Python, Java, SQL, JavaScript, Web-API's, .net, C# or other languages).

Implementing a technical solution to accommodate EU GDPR, IDMP or other standards.

Knowledge of pharma domains and experience within GxP regulatory requirements for IT systems.

Please submit your application in English, and if it's possible do not attach your picture.
All candidates are encouraged to apply for the given job regardless of their gender, age, religious beliefs, sexual orientation, national and social origin, political opinion, disability, race, skin color, and ethnic origin.
Apply now and make you mark!
