

## Principal Engineer (m/w/d) Membrane Technology

[Apply Now](#)

Company: Evonik

Location: Denmark

Category: architecture-and-engineering

### What we offer

As Principal Engineer Membrane Technology you are exploring a world of opportunities with us. Look ahead with us and help shape innovative solutions to make our world more sustainable and life healthier, more vibrant and more comfortable. At Evonik, you have the chance to explore, thrive, and grow alongside 33,000 colleagues. Among attractive career paths and high-quality development programs, we not only offer performance-based remuneration and occupational health benefits but also hybrid and flexible working environments with #SmartWork. Bring your fresh perspective, develop your strengths, break out your mold, and find a career that fits your dreams with us.

**Learn more about our membrane activities here:**

### RESPONSIBILITIES

Design and develop membrane modules based on market requirements, in compliance with necessary legal regulation (e.g pressure vessel) for all membrane businesses.

Identify and capture evolving market and membrane technology, providing direction and guidance to the membrane technological roadmap.

Lead, coordinate, moderate or otherwise participate in international and interdisciplinary teams globally that focus membrane technology (module design, membrane and module manufacturing technologies).

Act as technology management interface/liaison with other engineering disciplines and/or external partners to ensure optimal/successful field operation for (pilot) plant start-ups and commissioning of our membrane modules.

Organize & lead troubleshooting exercises internal and especially at customers site, when implementing new products into production/operation, as well as develop counter measures.

Develop, establish and revise manufacturing procedures, design and specify the purpose/specification for manufacturing equipment in general.

Steer technical discussions as Principal Engineer in strategically important and selected customer meetings to support membrane business activities.

Validating and equipping of new OEM partners for all membrane markets, integrating Evonik's technology into their product portfolio.

## **REQUIREMENTS**

Master`s degree in Engineering or related field

Minimum of 10 years of experience in the membrane technology industry

Strong technical knowledge and expertise in membrane design and manufacturing

Proven ability to drive innovation and develop new membrane design concepts and methods of module manufacturing

Excellent problem-solving skills and can-do attitude

Strong communication and interpersonal skills

Ability to work in a global and cross-functional team environment

Willingness to travel domestically and internationally as needed

Flexible working environment
