

Process Scientist and Process Engineer Pipeline (Dinamarca)

[Apply Now](#)

Company: Junta de Castilla y León

Location: Denmark

Category: architecture-and-engineering

Descripción:

Qualifications for Process Scientists:

An MSc in Chemistry, Biochemistry, Protein Chemistry, Biophysical Chemistry or (Bio-) Analytical chemistry

Ability to independently understand scientific principles required for manufacturing pharmaceutical substances related to the interaction of chemistry and equipment

Ability to monitor data and extract information

An appetite for connecting the understanding of process science to product quality

Process Engineer candidates should have the following or developing qualifications:

An MSc in chemical, industrial or mechanical engineering (or a BSc with some professional experience)

Ability to analyse data and independently extract information

An appetite for solving complex problems applying a systems approach to manage complexity and reach feasible applicable solution
