Company: Ramboll

Location: Copenhagen

Category: architecture-and-engineering

Job Description

Are you an OT Security Project Engineer or Project Manager? Do you want to work with energy transition projects such as PtX, Offshore Wind, Energy Intensive Industries, or Gas Infrastructure? Do you want to play a central part in our projects?

If this sounds like you, or you're curious to learn more, then this role could be the perfect opportunity. Join our Automation and Communication department as our new OT Security Engineer and work with us to close the gap to a sustainable future.

Your new role

As our new OT Security Engineer, you will be focused towards our clients, suppliers, and projects with responsibility for the relevant areas of the OT security services, such as management plan, risk assessment, architecture design (zones and conduit design, topology design, network design) and Supplier/Vendor management/engagement.

Your key responsibilities will be:

Acting as the project manager on OT security projects in close collaboration with clients.

Acting as the lead/project manager on multidiscipline projects along with the project team.

Design and specification of OT architecture and systems from an OT/cyber security perspective.

Cybersecurity deployment (e.g., IEC62443, NERC CIP, NIS2)

SCADA/Automation network design and configuration

Your new team

You will join an exceptional and high performing technical team with more than thirty colleagues in Denmark and supported by our global engineering centre. The department is highly experienced and delivers engineering and consultancy services globally, predominantly within energy transition projects such as PtX plants, offshore energy, power generation, and gas infrastructure.

About you

From the moment you start at Ramboll, we will support your personal and professional development so that you can continue to grow with the company. Whilst we look forward to supporting your continued learning and development, for this role we have identified some qualifications, skills, and capabilities that will set you up for success. These include: A bachelors or masters degree in Electrical / Instrumentation Engineering, Control Systems Engineering, Information Technology, or other related discipline.

Measurable relevant experience, or demonstrable technical understanding of Organisational Technology Security.

Excellent verbal and written communication skills in English.

Evidence of planning and managing multiple tasks, with a structured approach to meeting the expectations of multiple stakeholders.

Knowledge within some of the following areas: LAN/WAN, Wi-Fi, IoT, CCTV, Access Control Systems.

Within Ramboll's supportive learning culture there are always personal growth opportunities for passionate individuals who wish to learn. If you don't exactly meet all these requirements, we still encourage you to apply. We may have opportunities in other parts of our team.

What we can offer you

An outstanding opportunity to join our Energy Division, and team up with 2,000 experts in 14 countries, covering the full spectrum of technologies and all parts of the value chain.

Competitive base salary and benefits package.

Ongoing investment in your development.

Leaders you can count on, guided by our Leadership Principles

The long-term thinking of a foundation-owned company

Work at the heart of sustainable change

Ramboll is a global architecture, engineering and consultancy company. We believe that the purpose of sustainable change is to create a thriving world for both nature and people. So, that's where we start – and how we work. We bring a set of values that centre on collaboration and co-creation. Being open and curious is a cornerstone of our culture, embracing the mindset of always looking for new and better perspectives.
