

Senior Industrial Integration Engineer

[Apply Now](#)

Company: TotalEnergies

Location: Denmark

Category: architecture-and-engineering

Profil du candidat

“We are looking for a problem solver to join our team in the Industrial area. If you are motivated by finding solutions and you are a good team player, come and join the IT Operations & Industrial team. This is a great opportunity to work in a dynamic and fast-paced environment, where you will face daily technical challenges and learn from experienced professionals!” If you are passionate about solving complex problems and making a positive impact, you might be the perfect fit for our team as an Industrial Integration Engineer. As a Senior Industrial Integration Engineer, you will work closely with the business-Offshore and Onshore- to understand their needs and provide them with reliable and compliant solutions in line with TotalEnergies standards and local regulations. You will also be responsible for maintaining and troubleshooting the network connectivity of our industrial systems, as well as ensuring their security and integrity.**Your background:**

You are resourceful and able to manage multiple priorities.

You are good at problem solving and critical thinking.

You have excellent communication and interpersonal skills.

You are autonomous, flexible and a self-starter.

You are competent on network and firewall architecture.

Bachelor or master degree in engineering (electrical, instrumentation, mechatronic) or similar.

Extensive industrial experience with instrumentation, control and safety systems including transmitters and software necessary to control and monitor plant and equipment, AND/OR manufacturing execution systems (MES) applications, real-time automation systems, and production data management systems like SCADA.

Activités

Your day to day activities:

You will manage and deliver solutions within industrial IT devices, data acquisition systems, architecture, interfaces and services.

You will be responsible for the run of the industrial IT systems and their maintenance/troubleshooting in case of failure.

You will be involved in the execution of projects and maintenance activities together with the Engineering and Maintenance team. This includes planning , review of modification proposals and design packages , creation of Work Orders and follow-up of actions in ServiceNow.

You will be responsible for driving digital transformation, through IoT or similar technologies and the digital approach within this area for the affiliate.

You will maintain the CMDB (Configuration Management Database) and ensure alignment among TotalEnergies document management systems for the lifecycle of the industrial IT equipment.

You will manage all the licenses within the Industrial area and ensure centralization when possible.

The Benefits of the job Why do you need to join us?

You will benefit from a dynamic ecosystem and be part of a network with recognized and diverse skills, both operational and technical.

You will be able to develop your skills and apply them in the implementation, maintenance and evolution of telecom and industrial systems.

You will support digitalization projects by ensuring the connectivity of industrial sites.

The mission of One IT in Denmark is to provide IT services that enable our business to

succeed.

We work in partnership with everyone to introduce, innovate, digitalize and optimize solutions. We provide reliable and efficient services – Onshore and Offshore, ensuring that we can all deliver in line with our corporate strategy.

Join one of our 5 teams: Business Partnering, IT Operations & Industrial, Project & Performance, Data & Information Management and Cybersecurity and contribute to support the Company's continuous operations and development projects.

In a department with different nationalities and backgrounds, we believe in the power of diversity and collaboration. People are the key to our success, and we invest in their development and foster an atmosphere of innovation.

Contexte et environnement

One of our values is respect for each other. Creating an inclusive environment in which everyone can express and develop their potential, from the moment they are hired and throughout their career, means ensuring that all our employees have the same opportunity to succeed, regardless of origin, gender, age, disability, sexual orientation, gender identity or affiliation with a political, religious, union, organization, or minority group. This is our vision of diversity, which is an asset for our Group as well as for the individuals who embody it.

Preserving and promoting this asset is another part of being a responsible employer.

Company benefits: •Health benefits (health insurance, massage, gym) •Hybrid working program •Career development training •Employee growth plan •Newcome service •Partnership with Esbjerg International School •Performance driven bonus •Purchase

Company shares on favorable terms •Up to three working days per year volunteering during office hours •Employee discounts and sponsor tickets •Company Gifts and Celebrations

Would you like to help shape better energy? Send your application as soon as possible, as we will be conducting interviews on a continuous basis. For any questions, you are more than welcome to reach out to HR Recruitment on ep.dk-recruitment@totalenergies.com.

We look forward to receiving your application!
