Company: Jobly.fi

Location: Denmark

Category: computer-and-mathematical

At Lifebonder, we're on a mission to break social media addiction, fake personas, cyber-bullying, cancel culture, and loneliness by providing a Mesaverse that lives up to the promise of what social media can be: A safe place to facilitate human connections rather than replace them.

We want to make the world a better place by filling a growing need for direct socializing outside social media - connecting people in friendships that are human, profound, and meaningful. LifeBonder makes it easy for people to connect in a deeper reality through shared spaces, values, and goals because our vision is to build social bonds in real life.

### Experience

We are looking for an organized, detail-oriented individual to join our team as a software project manager. The responsibilities of the software project manager include overseeing software projects from start to finish, managing and motivating software developers and other team members, giving customer presentations, and writing project proposals.

To be successful as a software project manager, you should have a good working knowledge of project estimation techniques and the ability to motivate team members. Ultimately, a top-notch software project manager should have good communication and decision-making skills.

### Responsibilities

Discussing potential projects and their parameters with executives, and software developers.

Planning out the blueprints for software projects, including defining the scope, allocating resources, setting deadlines, laying out communication strategies, and indicating tests and maintenance.

Assembling and leading the project team.

Participating in and supervising each stage of the project.

Ensuring each project stays on schedule and adheres to the deadlines.

Creating a project budget and ensuring the project adheres to the budget as closely as possible.

Determining and overseeing consistent testing, evaluation, and troubleshooting of all products in all stages of completion.

Tracking milestones, deliverables, and change requests.

Serving as a liaison to communicate information regarding changes, milestones reached, and other pertinent information.

Delivering completed software products to clients and performing regular checks on the products' performance.

## **Skills**

A master's degree in information technology, software development management, software engineering, computer science, or a related field.

Proven experience in project management and software development.

Good working knowledge of project estimation techniques.

Excellent technical knowledge.

Good leadership, decision-making, and organization skills.

Strong attention to detail and multi-tasking skills.

## What We Offer

We are a team of endlessly dedicated developers offering a fun and friendly work environment where everyone is equal.

We offer real-world work experience and exciting challenges where you can make a real difference.

Awesome recommendations and when you're ready to move on, we've got your back.

Potential for Full-time hires at a later date.
